

2015-03-13

We are a company who make furniture mostly Kitchens, wardrobes and sliding doors

We are in need of a "partly" web based software to:

- calculate and make offers
- Handling of the order
- Manage our stock
- Do orders (email based)
- If possible, also a 3D representation of the offer
- Handling of bills

For this project I think we will need 2 persons for a period of 6 months

There will also later be a big possibility of an ongoing work contract
